Faisal A F Rahman

Front-end Web Developer

An intermediate-level DevOps Engineer and web developer with knowledge in machine learning.

EXPERIENCE

FRONT-END & BACK-END DEV DICODING

Aug 2023 – Dec 2023

I learned new things in the MSIB 5 program at Dicoding with the learning path "Front-end and Back-end Developer". In the program, I learned new things that I had never learned before, such as automation testing, web performance, CD/CI, mobile first approach, and so on.

DEVOPS AND BACK-END DEVELOPER AWS & DICODING

Oct 2022 – Jun 2023

Through the AWS and Dicoding-offered DevOps and Back-End Developer Scholarship Program, I gained practical experience in DevOps engineering, mastering core principles like continuous integration, delivery, and infrastructure automation, all while utilizing tools like AWS services, GitHub Actions, and Docker.

FRONT-END & BACK-END DICODING

Oct 2022

Through the Back-end Engineering Program offered by DBS, AWS, and Dicoding, I honed my back-end development skills, and then further solidified my knowledge through Dicoding's Front-end Engineering Program, where I gained practical experience with HTML, CSS, JavaScript, and frameworks like React.
